EXPERIENCE

HIGHLIGHTED PERSONAL PROJECTS

Full Stack Web Developer

Remote
March 2022 – Present

[Car-booking-App](#) – App that allows registered users to book cars using the client-side (Front end). For the backend, we built an API to organize and store data, as well as ensure that everything on the client side of the website functions properly.

- Built with: React, Javascript, Redux, Ruby, Rails, and Tailwind.

[To-Do-List](#) – This application implemented an interactive list of To Do tasks built using webpack and served by a webpack dev server where the user is able to mark task completion by selecting the corresponding checkbox (or undo it by unchecking the checkbox).

- Built with: React, Javascript, Html, and CSS.

[Festitech](#) – This project is designed to display an event, and give information necessary for this event. I implemented it thinking about an annual technology festival that is held in my country. and I chose this topic to realize it.

- Built with: Html, CSS, and Javascript.
